Agency: CDPHE

Purpose of Contact: Walk down of Building 889 and Notification #02-02 Discussion

Discussion

A meeting was held with Elizabeth Pottorff, Carl Spreng, and Dave Kruchek (CDPHE) to discuss the potential remediation at B889. Several issues were discussed including the following:

- Characterization sampling intervals would include 0.0 to 2.5 feet and if contamination was found additional intervals would be sampled
- The potential location of a tank/sump at the eastern portion of the building
- The location of exhaust sumps

CDPHE agreed to the sampling strategy. K-H agreed to further evaluate the potential sump location at the eastern portion of the building and add a biased sampling location in this area. The IASAP Addendum #IA-02-01, which had already been approved, was not modified, however, these changes were made in the RADMS sampling plan.
